I was originally going to buy this for the fact it was memes but that suddenly changed when the whole Pepe\/Matt Furie fiasco happened. Now it's just a stale card matching game. There's not much else to say about it to be honest.. Lets talk about "Animals Memory"-games made by Laush Dmitriy Sergeevich. If you like memo games, better find one on the internet, cause the one here is pretty bad. There are no trading cards and not so many images in the game (and all of them are very small, look bad and shine for some reason...), there is only one awfull looking background and one irritating music track. The game looks worse than free flash games I played about 2000, but I still can choose "fantastic graphics quality" in the options :D The "developer" (lol) made already 4 memo games (it's actually one and the same game with different animals images), another two are coming to Steam next week. The guy actually develops new product (with mixed opinions) every two months :D Srsly, bro or sis, avoid this "game". And I'll refund it, due too I finished it in under 10 minutes.... Nicely designed meme memory game with a decent level progression, cute animal pictures and a peaceful soundtrack. Resolution and window mode can be set via the typical Unity launcher.

Quick developer response and fix about a broken achievement, now they can be done in minutes.

The content is okay for the price.. A cheap memory game. Not that difficult, and not over-priced.. Memory game which you not gonna remember next day.

but It's for kids.
